## **DETAILED ACTION**

### ***Allowable Subject Matter***

1. Claims 1-10 are allowed.

2. The following is an examiner's statement of reasons for allowance: Claims 1-10 are allowed because prior art fails to teach or make obvious a method of measuring the characteristics of a thin film layer on the surface of a sample comprising comparing the measurements of the intensity of the various X-rays within a reflected probe beam to corresponding measurements of an unattenuated probe beam made with a sample removed from the X-ray pathway as claimed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

### ***Conclusion***

3. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Belanger (US Patent 4,727,562) and Roder (US Patent 4,064,440) disclose measurements of an unattenuated X-ray beam made with a sample removed from the X-ray pathway. Kurtz (US Patent 5,848,122), Vu et al. (US Patent

Art Unit: 2882

6,381,303 B1) and Mazor et al. (US Patent 2002/0001365 A1) disclose the methods of measuring the characteristics of a thin film layer on the surface of a sample.
